FOR IMMEDIATE RELEASE, NOVEMBER 1, 2019

NEWS RELEASE

Water Utility Project to Close Traffic Lanes on College Drive and Interrupt Water Service

Durango, CO: Starting on Monday, November 4, the City of Durango's Utilities Department will start replacing water service valves along College Drive. This capital improvement project will cause lane closures between 4th Avenue and 6th Avenue along College Drive while construction crews are working in the right-of-way. Replacing valves will also cause periodic interruptions of water service to residents in the immediate area. The project construction is expected to last into early December. Motorists are encouraged to use caution while driving in the area and use detours if possible.

For more information about the water valve replacement project, please contact the City of Durango Utilities Department at (970) 375-4801.
